After the success of the previous editions Safe - Energy Resources and Environmental Sustainability - proposes the Post-Graduate Programme "Management of Energy Resources" in co-operation with leading companies of the energy sector, universities and government institutions.

Endorsements 8th edition: Senate of the Italian Republic; Ministry for the Environment, Land and Sea; Ministry of Infrastructure; Ministry of Economic Development; Antitrust Authority; International Energy Agency; Lazio Region; Province of Rome; Rome City Council; AIGET; Assoelettrica; Assomineraria; Unione Petrolifera

The Programme is designed to develop advanced technical skills in development, production and management of energy resources with a strong environmental focus and the relevant strategic, economic and legal framework for such activities. The Programme is addressed to graduates and to professionals operating in the energy sector.

The Programme stimulates research and application of innovative technologies.

The course structure promotes a better communication between operators, both private and public, central and local authorities and represents a welding point of industry, academia and government institutions.

Dr. Raffaele Chiulli, President of SAFE, is the course's Director.

The Programme lasts nine months for a total of 600 hours, including lectures, seminars, practical exercises, field trips, meetings with top management, workshop and visits to operational sites.

Post-graduate programme headquarters' is in Rome.

Lectures are given by a highly qualified group of energy and service companies' top managers, university professors and public officers.

Lectures are supplemented by in-company training opportunities, project work and field visits giving participants the opportunity to experience industry operating practices.

There are 25 places available to graduates from an Italian or a foreign university.

Attendance is compulsory.

Applicant must be fluent in English.
